Duration	Organization	Designation
July 2022 to till now	Tata Technologies Pune	Application Developer

Project : Complexity matrix
Type : Development
Client : Tata motors
Role : Developer
Team Size : 2
Duration : 1 years

Complexity Matrix is a web application developed for Tata Motors employees to efficiently manage inventory data. The platform allows users to dynamically add, view, and delete data imported from Excel files. It streamlines inventory management by providing a centralized solution for tracking available parts and inventory on a single, user-friendly interface.

Duration	Organization	Designation
Feb 2022 to July 2022	MIndbrowser Infosolution Pune	Software Engineer

Project : Mocingbird
